### Great Lakes Coal Trade Down 49 Percent in January

CLEVELAND – Shipments of coal on the Great Lakes totaled 382,318 tons in January, a decrease of 49 percent compared to a year ago. The decrease was even greater – 62 percent – when compared to the month's 5-year average.

Loadings at Lake Superior ports fell approximately 67 percent compared to both a year ago and their 5-year average.

Shipments from Lake Michigan more than doubled their volume of a year ago and were 20,000 tons ahead of the month's 5-year average.

The coal trade out of Lake Erie was little changed from a year ago, but almost 70 percent below its 5-year average.

Lake Carriers' Association represents 17 American companies that operate 56 U.S.-flag vessels on the Great Lakes and carry the raw materials that drive the nation's economy: iron ore and fluxstone for the steel industry, aggregate and cement for the construction industry, coal for power generation.... Collectively, these vessels can transport more than 115 million tons of cargo per year when high water offsets lack of adequate dredging. Those cargos support more than 103,000 jobs with an average wage of \$47,000. More information is available at [www.lcaships.com](http://www.lcaships.com).
